

>> Program Length

Research shows that the briefest interventions sometimes produce the greatest effect. 3rd Millennium Classrooms is a pioneer in developing short, interactive lesson modules that impact behavior.

3rd Millennium courses can be completed in 3 to 4 hours. Some students take longer and can work through the lessons at their own pace.

>> 3rd Millennium Design

We combine evidence-based intervention techniques, personalized feedback, and interactive exercises in a motivational interviewing style.

Personalized feedback allows the student to identify with the course material. This leads to more honest responses without the peer pressure and embarrassment of revealing personal information in a class setting.

Our e-Check Up to Go partners at San Diego State University created the Personalized feedback component that's integrated into all 3rd Millennium alcohol and drug education courses. You can check out the research by visiting our website at www.3rdmilclassrooms.com and selecting the *Research* tab.
